

Streaming video solutions for corporate training and communication

Grow corporate event attendance by live streaming

Reduce cost per attendee by increasing online or hybrid event attendance

Use video to reach everyone and keep them engaged and aligned, despite time and distance

Sharing training sessions in rich media video
Capitalize company knowledge and know-how

Feed e-learning programs by producing scripted videos (MOOC, SPOC, tutorials)

Veolabs as a solution

Capturing and producing videos (training rooms, amphi, MOOC studios)

- Veobox, simplifies video recording in rich media format
- Professional video cameras and other associated A/V equipment
- It can be integrated in fixed systems for classes or available in specific cases in a context of mobility (VeoStudio)

OpenVeo

Publishing solutions, internalized or hosted

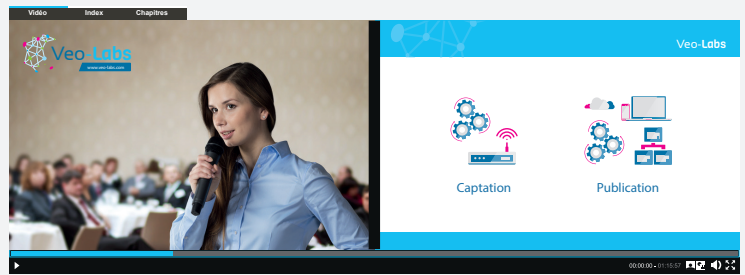

- The modular OpenVeo software, associated to streaming platforms, to manage the life cycle of the video content, from producing to publishing
- Pack of engineering services for integration and personalization of the platform within the IT environment of the company

The strengths of the Veo-Labs solution for digitizing corporate events and trainings

Produce easily scripted videos

Capture the different video plans of your MOOC/SPOC content, by recording mix format of PC and video camera.

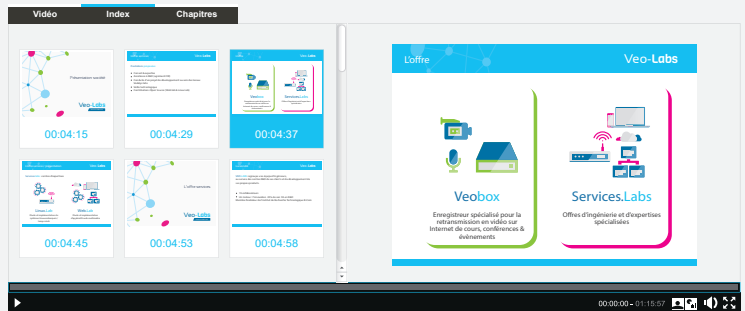

Finalize easily the content thanks the video editing tool directly from the web page of veobox.

Live streaming in secure or viral way

Live intranet/extranet streaming with veobox and internal streaming server with access control features.

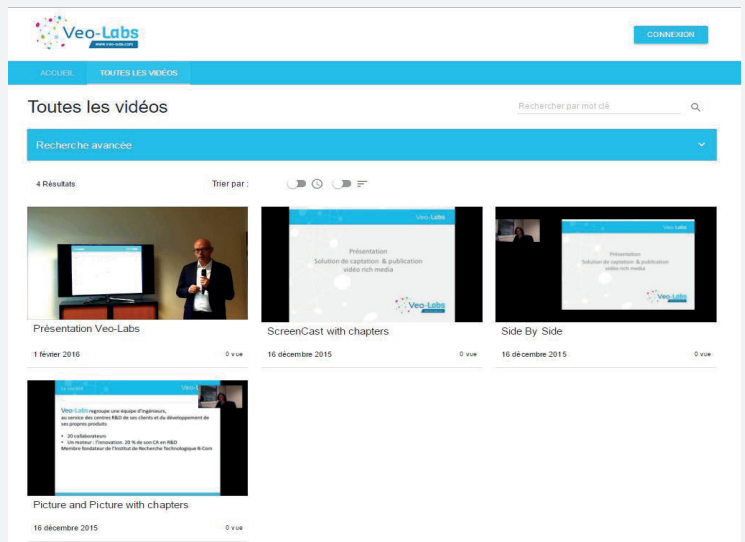

Live webcast with veobox and internet video platform like Youtube, Facebook live or wowza streaming cloud

Capture training sessions and seminars

Capture camera vidéo and and PC screen's speaker with automatic slides extraction features of Veobox.

Allow people to review the indexed rich media format with OpenVeo Publish and adanced web video player.

Publish the videos and manage their visibility

Videos stored in the OpenVeo Publish database are published in specialized portals (Portal template for OpenVeo) or integrated to the company's web platforms (rights management and integration managed by web services).

The benefits of the Veo-Labs solutions

Using video instead of writing, your communication becomes more attractive

You provide to the employees or dedicated people, a better information broadcast, in live or on demand.

You can easily produce and publish video contents with high confidentiality or in viral way over Internet or social networks
